OBJECTIVE

Final-year Software Engineering student at UIT (graduating November 2026) with proven experience building production-grade React/Next.js applications — including a solo-developed AI-powered e-commerce platform with real-time WebSocket communication and a Hybrid Scoring recommendation engine. Proficient in React rendering internals (Fiber reconciliation, memoization strategies, custom Hooks), state management with Zustand and Redux Toolkit, and translating Figma designs into pixel-perfect, performant UIs with strong Core Web Vitals results. Seeking a Frontend role where deep component architecture, scalability, and UI craft are valued.

EDUCATION

University of Information Technology

Oct 2022-July 2026

Software Engineering

- **GPA: 3.0 / 4.0**
- **TOEIC: 950+** (Listening & Reading)

WORK EXPERIENCE

T4Tek

Oct 2025-Jan 2026

Frontend Intern

- **Component Development:** Built reusable OWL (Odoo Web Library) UI components for internal ERP modules, applying component-driven architecture and lifecycle patterns analogous to React's Hook model.
- **API Integration:** Integrated frontend views with backend Python services via RESTful endpoints, handling async data flow and error states in live ERP environments.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3 / SCSS, Python
Frameworks & Libraries	ReactJS, Next.js, Framer Motion, Zustand, TanStack, TanStack Table, WebSocket / Socket.io, SVG React libraries, Redux Toolkit.
Styling	Tailwind CSS, SCSS, styled-components, Figma → Code workflow
Back-end & DevOps	Node.js, Express, REST API, Docker, Git / GitHub (Git Flow)
Databases	MongoDB, PostgreSQL, LocalStorage.
Tools	Vercel, Spline 3D, Canva, Claude Code, Antigravity.

PROJECTS

AI Hybrid Chatbot E-Commerce System

June 2025-June 2026

Undergraduate Thesis Project · Solo · UIT

github.com/khiemvuong/e-commerce-saas

- **Microservices System:** Built a full-stack e-commerce platform using React, Next.js, and Node.js.
- **Fast AI Chatbot:** Implemented real-time streaming chat via WebSockets with response time < **200ms**.
- **High Quality:** Passed **59 strict test cases** covering APIs, sockets, and recommendation logic.
- **Backend & Database:** Used MongoDB, Redis caching, and Docker Compose to handle concurrent traffic.

OHAL Website Redesign

Jan 2026-April 2026

Frontend Lead · Client Project · Team

ohal.com.vn

- **Main Designer & Developer:** Personally created Figma designs, owned the UI architecture, and **integrated all main APIs**.
- **Performance Optimization:** Achieved excellent Core Web Vitals (**LCP < 1.5s and INP < 200ms**) and optimized SEO for high search ranking.
- **Admin Dashboard:** Built a functional management dashboard from scratch using TanStack Table.

Multiplayer Board Game Suite

Jan 2026 – Present

Solo · Full-stack

xizach-online.vercel.app

- **Server-Authoritative Game Engine:** Built decoupled rule engines (Avalon, Deception, Werewolf) on Node.js with deterministic state machines — all game transitions, role assignments, and voting phases validated server-side to eliminate client cheating.
- **Real-Time Orchestration:** Implemented delta-based Socket.io state sync and bi-directional event schemas for lobby management, chat, mic status, and role actions across concurrent game rooms.
- **Complex Responsive UI:** Built circular player layouts using trigonometry-based ellipse positioning, proportional avatar accessory scaling, and 100vh viewport-constrained layouts optimized for both desktop and mobile landscape.
- **Stack:** Next.js (App Router), React, Zustand, Tailwind CSS v4, Socket.io, WebRTC, TypeScript, Docker.

TOEIC Vocabulary Learning App

Jan 2026-June 2026

Personal Project · Solo · No Backend

english-vocab-rho.vercel.app

- **Smart Learning:** Developed a vocabulary tool focusing on **context-based learning** and TOEIC Part 5 detailed explanations.
- **Audio Features:** Built a pronunciation module supporting the "**Listen and Read at the same time**" method.
- **No Backend:** Saved all data via LocalStorage; deployed on Vercel with instant loading times.

ADDITIONAL INFORMATION

- **Languages:** Vietnamese (Native) · English (Professional – TOEIC 950+ L&R)
- **Soft Skills:** Client communication, task breakdown & delegation, code review, attention to detail, self-directed learning
- **Interests:** Creative UI/UX design, 3D web experiences (Spline), dark futuristic aesthetics, open-source tooling.
